Training For
Customer Relation Officer

Customer relation officer and customer?

Who is customer ?

- who need your assistance.
- They are not an interruption to your job.
- They are the reason you have a job.
- **CUSTOMER RELATION OFFICER?**
- To assist with the needs of customers.
- Communicates any problems or concerns with other departments in the company.
- Conduct Analysis/investigations.

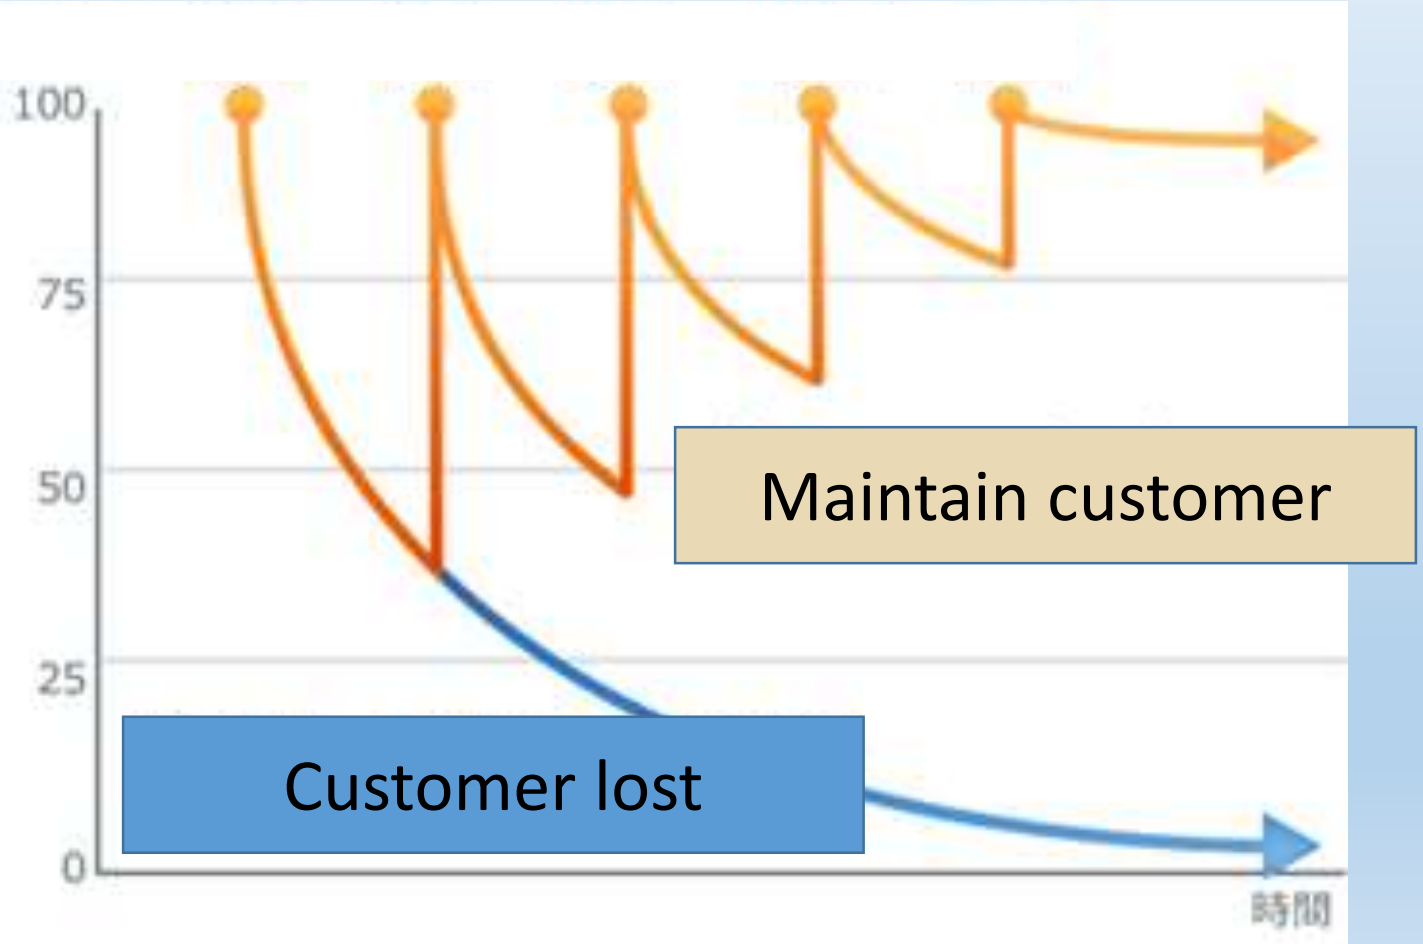

WHY CUSTOMER RELATION DEPARTMENT?

- Concept of Evoked Set?

“Customers must be contacted at least once every three months”

- If 90 days (three months) pass without any contact with customers, their memories will begin to fade. For customers, our dealer will become just the place where they bought their vehicle. The faces and names of our staff will be more difficult to remember.
- If another 90 days pass (total of six months), customer memories will have faded still further. The dealer will not feel approachable and customers will not be able to remember the names of staff.

Periodic touch to the customer keeps you as first choice of the customer

Required Skills ?

- Knowledge.
- Persuasive Speaking Skill.
- Ability to Use Positive Language.
- Clear Communication Skills
- Self-Control
- Taking Responsibility
- Patience
- Effective Listening
- Time Management
- Willingness to Improve
- Ability to Admit You Don’t Have the Answer
- Confidence

Service Vision

Making our customers to select **SUZUKI** products again in the time of next purchase through total satisfaction for all of our existing customers

Service Mission

Making our customers to select **SUZUKI** products again in the time of next purchase through total satisfaction for all of our existing customers

GOOD SERVICE

- Customer Care
- Good Customer Handling
- Facilities
- Competent Skills
- Timely Quality Work
- Reasonable Charges

GOOD VEHICLE

Satisfaction and Trust From Customer

Strengthen Customer database for Repurchase

New Customer entry by good word of mouth

Securing Profits

Stability of Dealer Management

Introduction of Models

1975	Ravi – Pick up .

• New CULTUS	AVK310
• All New Alto	AET306
• All New Swift	A2L412

Market Share of Locally Produced Passenger Cars & LCVs
(OEM wise comparison)

Important Fact

In Pakistan, Passenger cars per 1000 people is **31**

To grab car buyers, we need to sell again to whom already bought a car.

And customers who buy from you before,

is the easiest target to sell car again.

Who is Suzuki Customer?

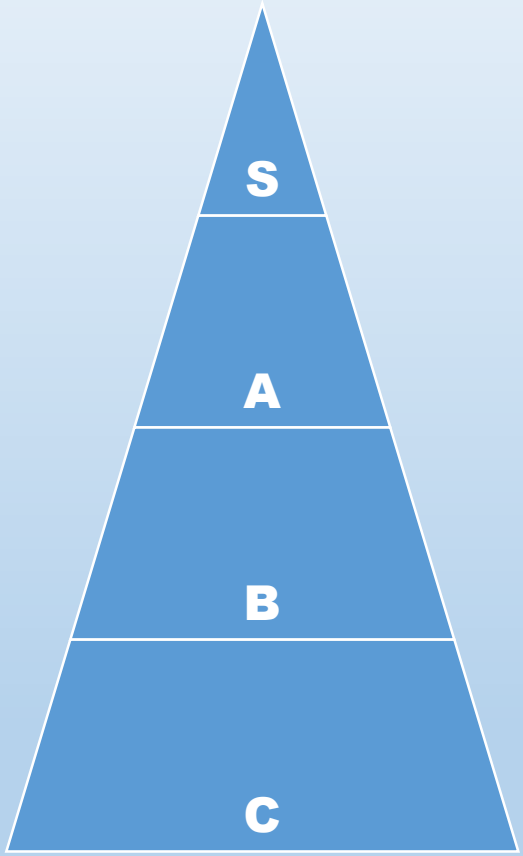

A Person who buys Suzuki products and services
with **expectation of economical values**

4 Types of Suzuki Customers:

- Price Buyers
- Relation Buyers
- Value Buyers
- Poke Player Buyers

Suzuki Customer Categories

	S Class	A Class	B Class	C Class
Purchase Vehicle	O	O	O	O
Extended Warranty	O			
Suzuki Insurance	O			
FFI	O	O	O	O
SFI	O	O	O	
20,000km Check	O	O		
30,000km Check	O	O		

Defining CS

Customer satisfaction, a business term, is a measure of how products and services supplied by a company meet or surpass customer expectation.

CUSTOMER'S MINDSET

1. **SATISFIED**

IF Provided Appropriate Services

- Collect Customer Loyalty
- Good word of mouth among friends/family
- Positive reflection of Corporate Image
- Increase in Customer Retention

CUSTOMER'S MINDSET

2. NOT BAD

Provided Services is at Border-Line of Expectations

- Low chances of Recommendations
- Customer thinks about switching
- Neutral reflection of Corporate Image
- Impact on Customer Retention

CUSTOMER'S MINDSET

3. DISSATISFIED

Provided Services is below than Customer's expectations level

- Bad word of mouth the Friends/Family
- Customer will definitely switch
- Negative reflection of Corporate Image
- Decrease in Customer Retention

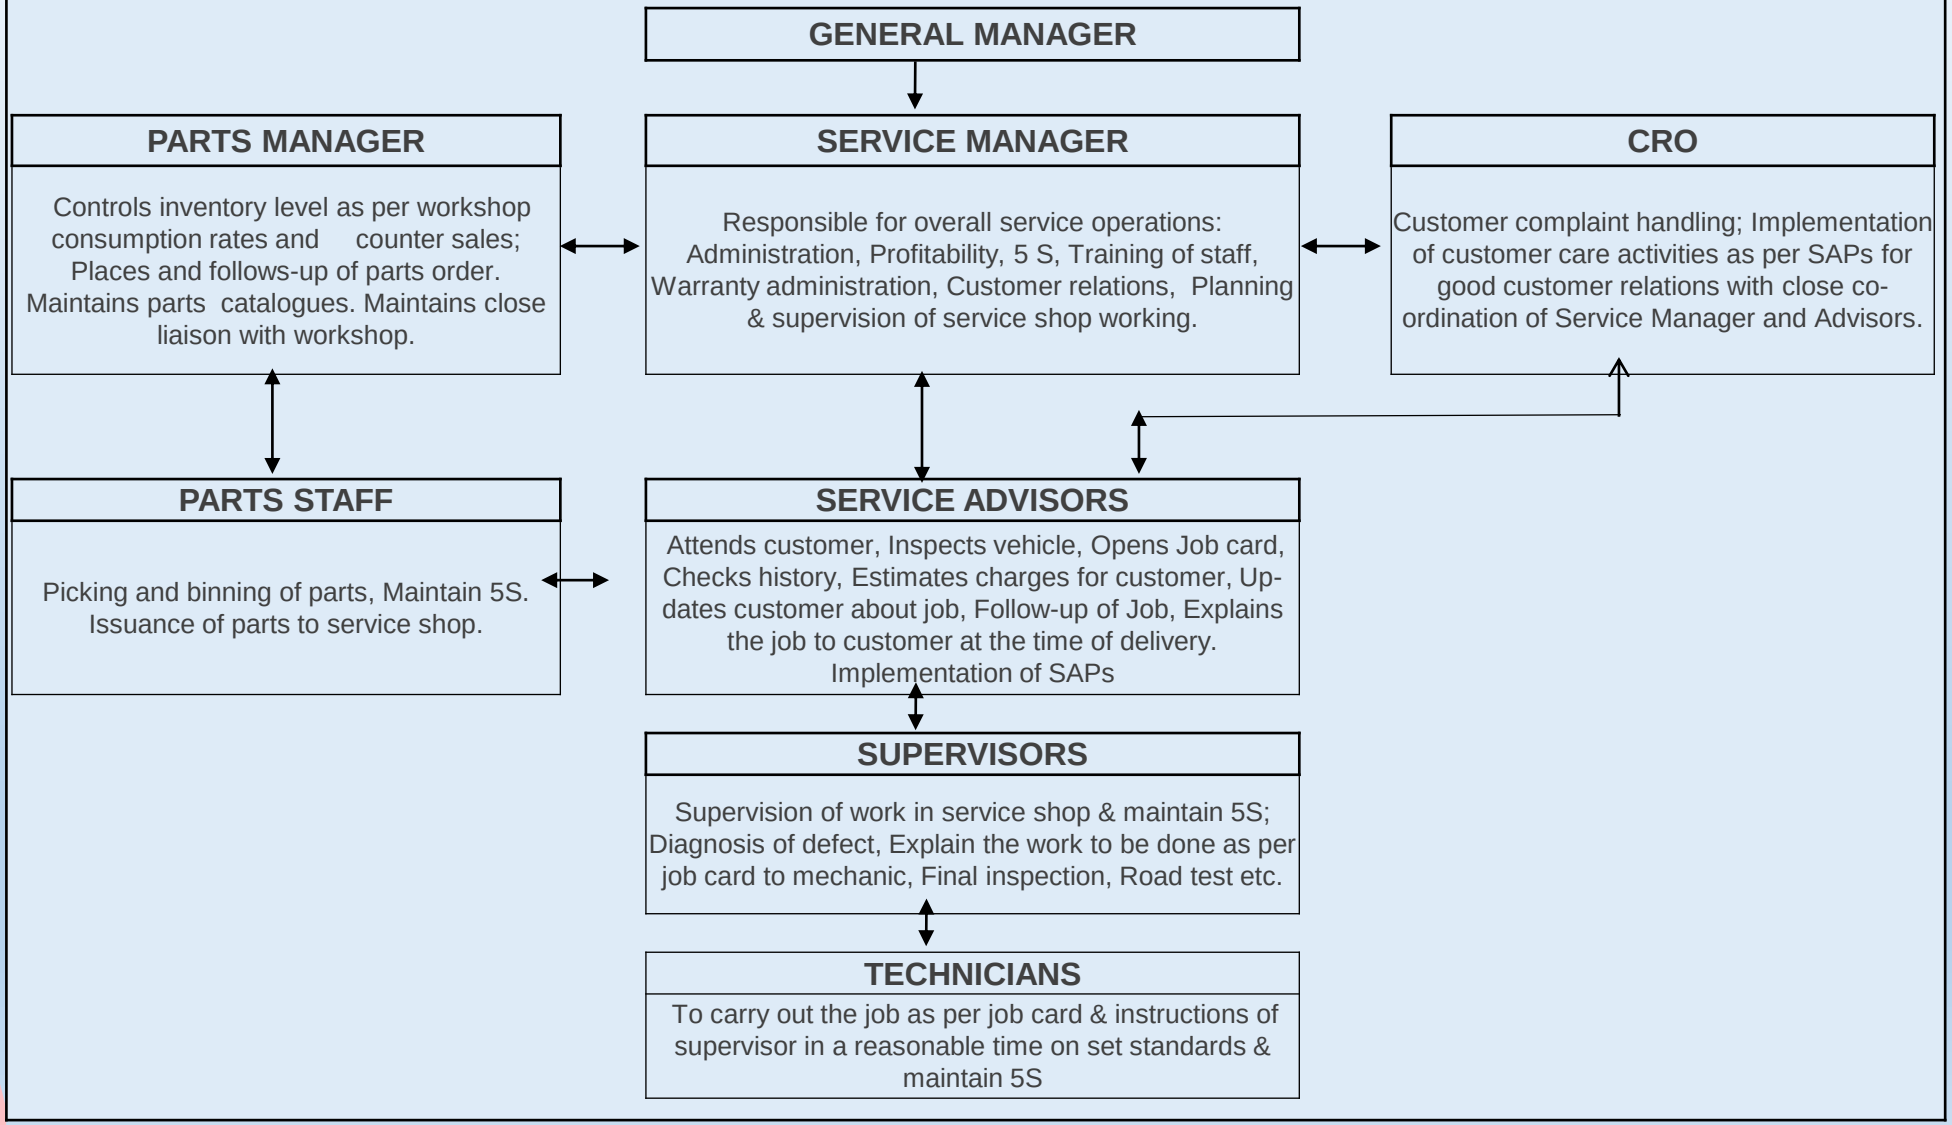

CS Leads to 3R

R - REVISIT (Loyalty)

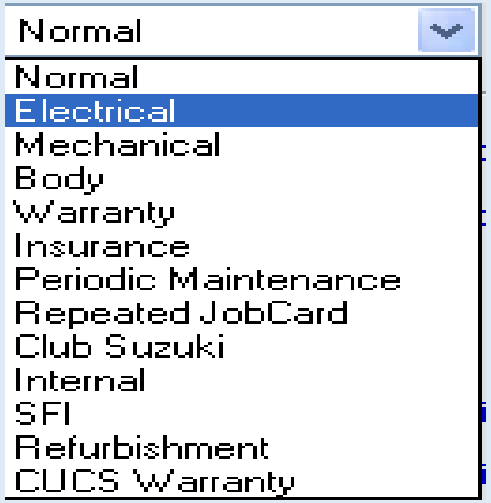

R - REPURCHASE (Loyalty)

R - RECOMMENDATION (Advocacy)

ORGANIZATION OF WORKSHOP

Job Cards Type

- ❑ PDI JOB CARD
- ❑ FFI JOB CARD
- ❑ SFI JOB CARD
- ❑ WARRANTY JOB CARD
- ❑ MECHANICAL JOB CARD (Heavy Repairs, Normal Maintenance, Periodic Maintenance)
- ❑ DENT PAINT JOB CARD

SERVICE ACTIVITY PROCEDURES (SAP)

Responsibilities Of CRO

- Handling of Customer Complaints.
- Handling of Service Feed Back Card & deciding counter measure along with Management.
- Post Service Follow up and Analysis/Countermeasures.
- Repeat job Analysis/Countermeasures and Attending the special customer's vehicle (Repeat Job), supervise the required jobs.
- Care for Customers at waiting area.
- Implement SAP (new vehicle delivery) in coordination with sales staff.
- Timely Follow-up for Next Due Maintenance by sending follow-up letters and calls.

Feed Back Cards

Objective: Improve overall workshop service to get total CS.

Action: To get an immediate feedback on the customer's experience at workshop.

1. Repeat visit for same problem.
2. Timely delivery of vehicle.
3. Quality of cleanliness of the car.
4. Reasonable charges.

Critical activities affecting customer satisfaction

- The service advisor should hand over this feedback card to the customer.
- Feedback cards must be analyzed on weekly basis by CRO and submitted to Management for counter measure.

Please rate your service experience for the following parameters on scale of 1-10 as under : Excellent (10) Very Good (9) Good (8) Fair (7) Poor (6 & below)

1. Friendliness and courtesy shown to you while receiving your vehicle	1	2	3	4	5	6	7	8	9	10
2. Service Advisor done accurate listening and capturing the demanded repair, requested by you.	1	2	3	4	5	6	7	8	9	10
3. Satisfactory explanation of charges & work done in your vehicle as per demanded repairs.	1	2	3	4	5	6	7	8	9	10
4. Over all experience while waiting for your car to complete necessary service/repairs.	1	2	3	4	5	6	7	8	9	10

5. Any Other suggestions

Post Service Follow-ups

PSF

OBJECTIVE:

- To ensure that vehicle which has been delivered to customer after service should be free of any defects and customer enjoy driving with peace of mind.
- To develop a statistical base to monitor frequency of common problems related to service and service quality.

ACTION:

- To Contact Customer on telephone 3-4 days after service to enquire about satisfaction with work performed.

ANNUXURE D

POST SERVICE FOLLOW UP WEEKLY REPORT

Report For The Week : 11 TO 16 Feb 2023

Dealer Name: ABC MOTORS

DESCRIPTION		LAST WEEK	THIS WEEK
Total No. Of Customers	A	360	435
No. Contacted	B	320	418
% Contact	C = (B/A * 100)	88.89%	96%
Satisfied	D	304	410
% Satisfied	E = (D/B * 100)	95.00%	98%
Dissatisfied	F=B-D	16	8
% Dissatisfied	G=(F/B * 100)	5%	2%
Dissatisfied Attended	H	13	7.36
% Attended	I=(H/F*100)	81.25%	92%
Dissatisfied Pending	J=F-H	3	1
% Pending	K= (J/F * 100)	18.75%	8%

Repeat Job cards

Repeat Job Handling

Any vehicle which is reported with the same problem within 1000 km or 20 days of the last visit (which ever comes first) should be considered as Repeat Job.

OBJECTIVE:

To ensure the customer satisfaction with our product and services by correctly identifying all Repeat jobs, giving them top Priority in workshop and taking countermeasures for improvement.

PAK SUZUKI SERVICE ACTIVITY PROCEDURES

CASE HISTORY OF REVISIT / REPEAT JOBS

Customer's Name	Dr. Shafiq ur Rehamn			Vehicle Regn. No.		ACK-778	
Telephone No.	1234567			Mobile No.	0300-1234567		
Date of Delivery	19/02/2013	Model	SB308	Chassis No.	125454	Engine No.	B457847

Previous Job Detail	Job Demanded	Action Taken
KM: 9890	1. 10000 KM INSPECTION.	1. ELECTRICAL / MECHANICAL CHECK UP
PSF Date: 20-8-2010	2.	2. ENGINE TUNE UP
Status:	3.	3.
(I) Satisfied	4.	4.
(ii)Not satisfied √		

Current Job Detail	Job Demanded	Action Taken	Repeat
KM: 10120	1. MISFIRING	1. TAPPIT ADJUST	
PSF Date: 28-8-2010	2. DOOR GLASS HARD	2. LUBRICATTE	
Status:	3.	3.	
(I) Satisfied √	4.	4.	
(ii)Not satisfied			

ANALYSIS

AFTER RE ADJUSTMENT OF TAPPIT AND LUBRICATION OF DOOR GLASS VEHICLE IS FINE.

Reasons For Generation of Revisit / Repeat Job	
1. Product Quality	
2. Poor Diagnosis by Supervisor.	
3. Road test not done.	
4. Poor workmanship in last visit.	√
5. Spare parts not available.	
6. Casual attitude of mechanic / Supervisor.	
7. Poor response /postponing repair by workshop	
8. Not adhering to warranty policy.	
9. Misbehavior during previous visit.	
10. Poor PDI by the PDI staff.	
11. Request for replacing parts under warranty / refund.	
12. Clarification / queries / feedback / suggestions	
13. Customer Education.	

Sign of supervisor: Sign of Service Manager:

COMPARISON OF REPEAT JOB ANALYSIS KARACHI REGION

July to December 2021

Dated:30-01-2022

Nos. of Repeat Job (Reasons)	Jul to Sep 2021	Oct to Dec 2021	Comparison
	326	315	-11

	Reasons For Generation of Repeat Job	Jul to Sep 2021	Oct to Dec 2021	Comparison
1	Poor workmanship in last visit.	38.03%	34.28%	-3.75%
2	Poor Diagnosis by Supervisor.	7.66%	14.92%	7.26%
3	Road test not done.	19.01%	14.92%	-4.09%
4	Customer Education.	19.63%	13.33%	-6.30%

12	Not adhering to warranty policy.	0.30%	0.00%	-0.30%
13	Poor PDI by the PDI staff.	0.00%	0.00%	0.00%

HOW TO DEFUSE, DISARM & DEFLECT VERBAL CONFLICT

When people complaint, don’t explain;
take the AAA train:

- Agree
- Apologize
- Act

Minimizing Repeat Job

Key Points:

- Ensure that vehicle should be delivered to customer; free from any defect.
- Perform standardized final inspection of all vehicle(s) before delivery.
- Analyze and take concrete countermeasures to Remove Repeat Jobs.
- In house training of workshop and office staff should be conducted on regular basis.

Next Due Reminders

Why This Activity is Carried Out?

OBJECTIVE:

To increase Customer Retention and Customer Satisfaction by ensuring that due service is done at the right time through personal contact to remind them of periodic maintenance schedule of their vehicles.

Service Department Products

- Maintenance Schedule (FFI, SFI, 5K,10K,15K,20k)
- Monthly specials (Free checkup campaign)
- Maintenance Packages (Monsoon wash free, free AC checkup)
- Schedule Maintenance Required Parts (Engine oil, oil filter, AC filter, spark plug etc.)
- Body Repair work & Parts

Timely Delivery After Service

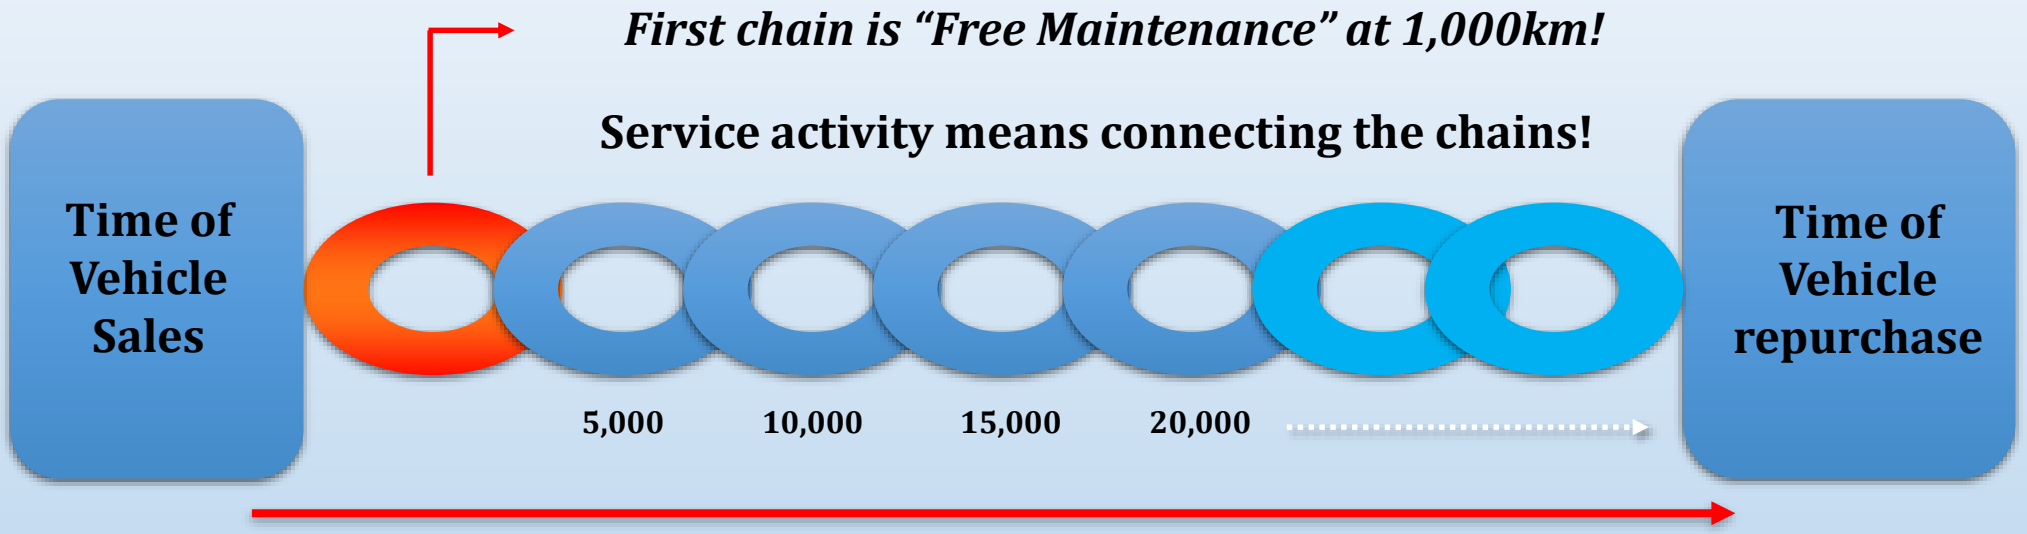

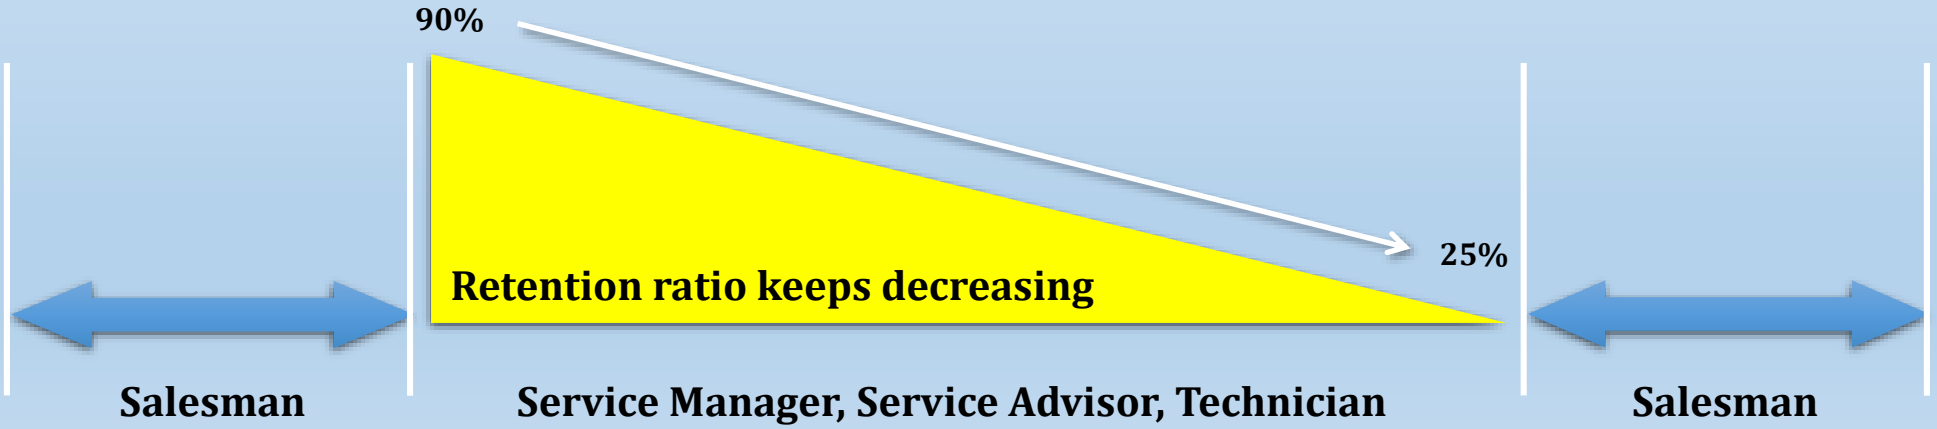

Timely Delivery

Objective: To ensure delivery of vehicle at promised time.

- Introduction of Time Control Tag
- Time control tags will be made of acrylic sheet normally in 2 colors White or Yellow.
- This tag is hung inside rear view mirror of the vehicle.
- To identify vehicles delayed beyond promised delivery time a red hanger should be hung for clear identification.
- The delivery time mentioned on the card should be 30 minutes earlier than the promised time to the customer.

Service Activity - FFI

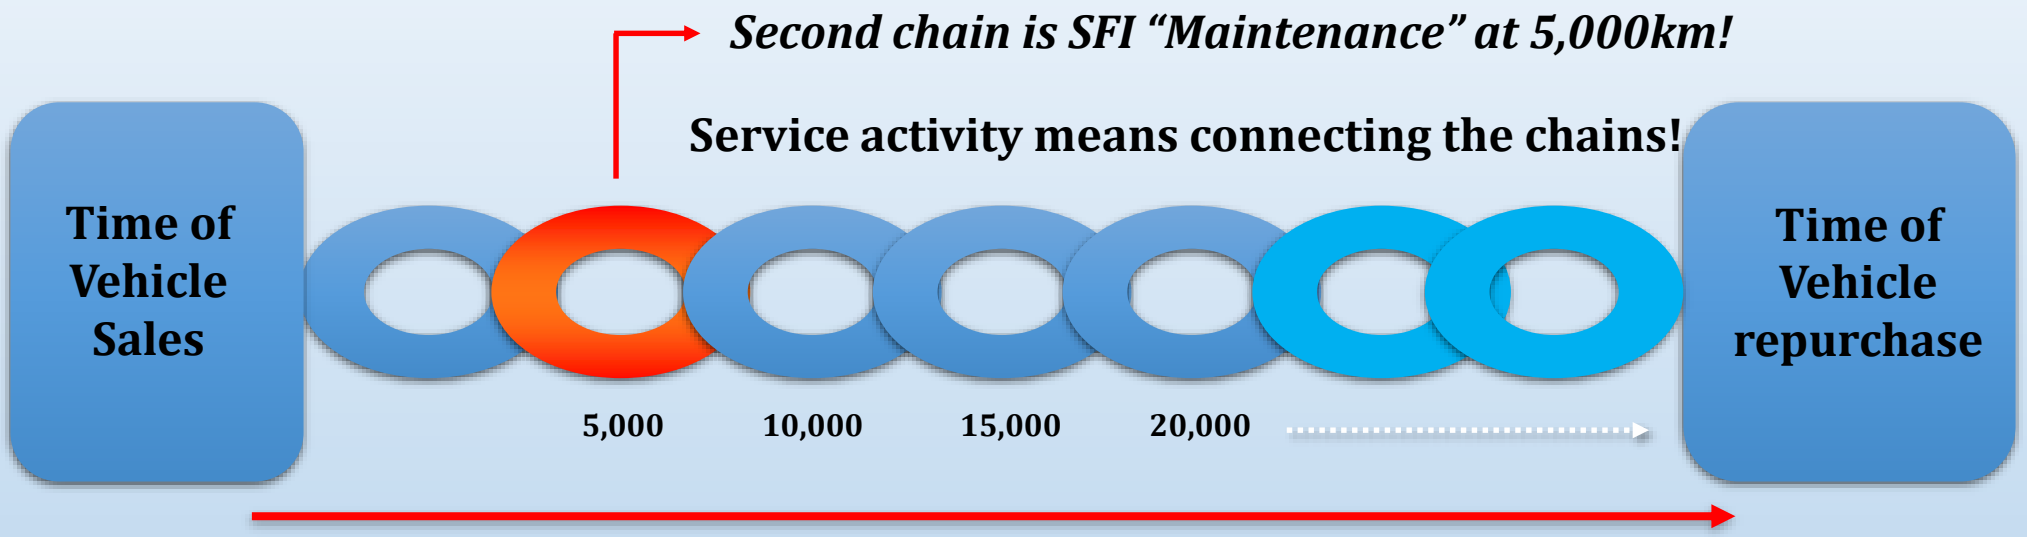

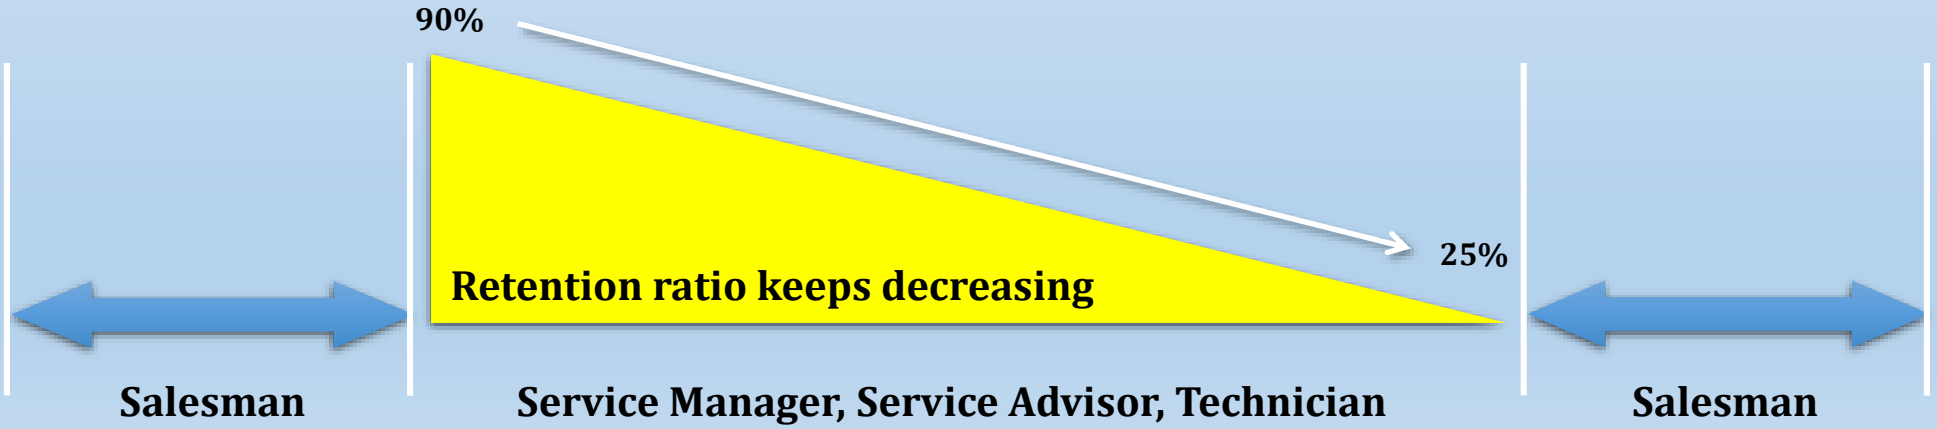

What we do in FFI?

- **ENGINE:** Visual mechanical inspection and adjust if required.
- **FUEL SYSTEM:** Inspection of fuel lines, hoses, connection and leakages.
- **ELECTRICAL:** Inspection of battery electrolyte level, combination and other electrical switches.
- **CLUTH and TRANSMISSION:** Inspection of pedals play and gear shifting adjust if required.
- **BRAKES:** Inspect brake pedal play adjust if required.
- **PARKING BRAKE LEVER:** Inspect lever notches adjust if required.
- **UNDERBODY INSPECTION:** Visual inspect all under body nuts and bolts.
- **TEST DRIVE:** Check brakes, gear shifting, speedometer, AC and all other unwanted vibration and noises.

Service Activity - SFI

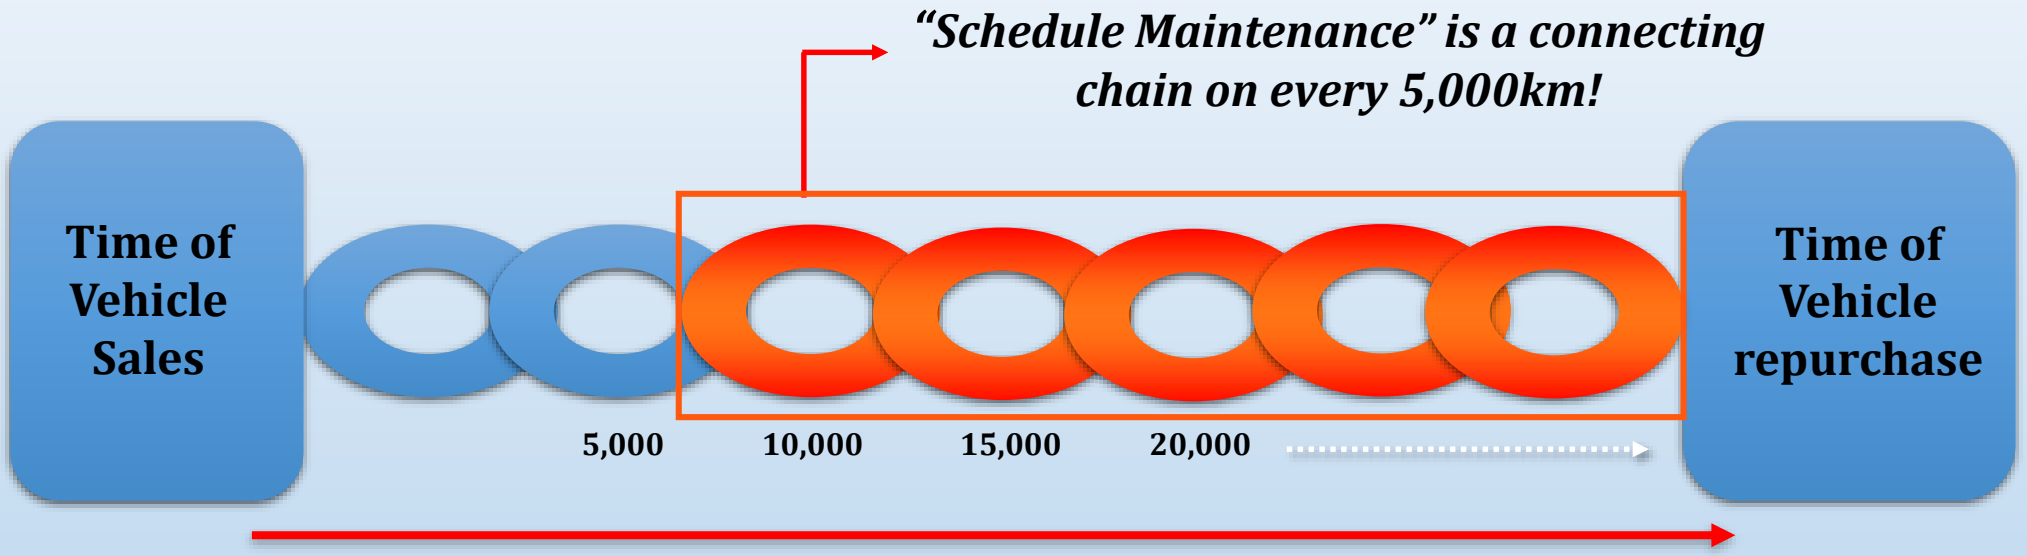

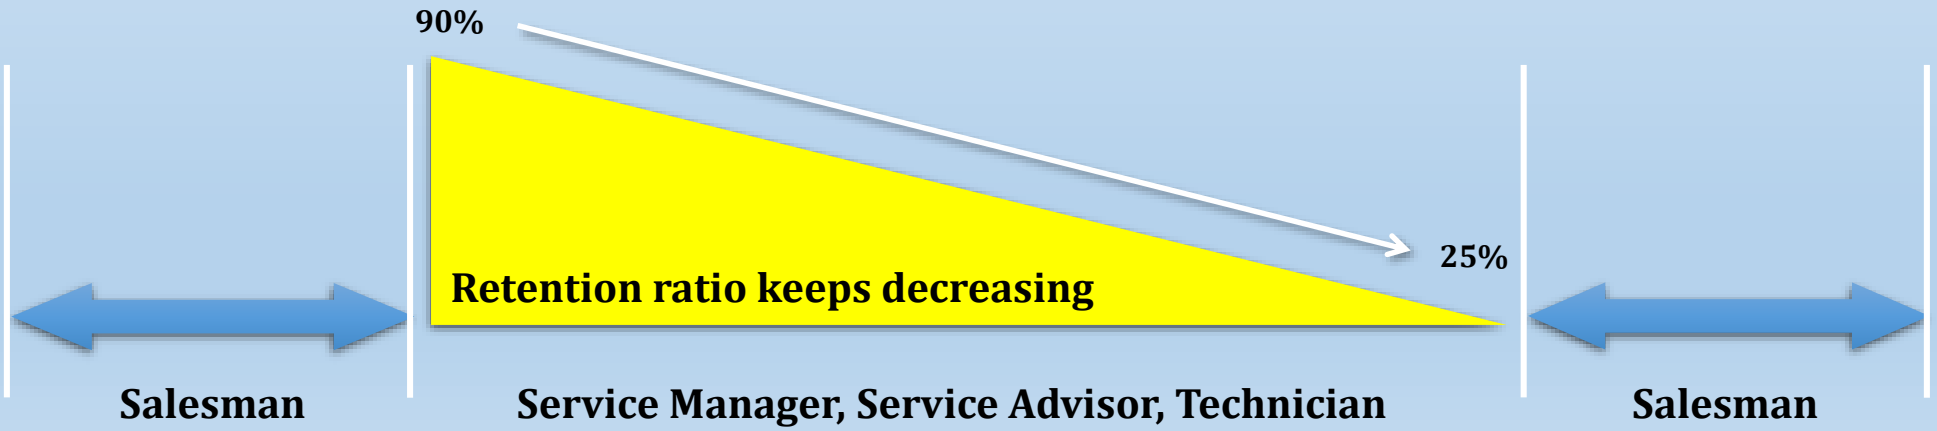

What we do in SFI?

- **ENGINE:** Visual mechanical inspection and adjust if required. Replace engine oil and oil filter.
- **FUEL SYSTEM:** Inspection of fuel lines, hoses, connection and leakages.
- **ELECTRICAL:** Inspection of battery electrolyte level, combination and other electrical switches.
- **CLUTH and TRANSMISSION:** Inspection of pedals play and gear shifting adjust if required.
- **BRAKES:** Inspect brake pedal play adjust if required.
- **PARKING BRAKE LEVER:** Inspect lever notches adjust if required.
- **UNDERBODY INSPECTION:** Visual inspect all under body nuts and bolts.
- **TEST DRIVE:** Check brakes, gear shifting, speedometer, AC and all other unwanted vibration and noises.

Schedule Maintenance

What we do in SM?

- **ENGINE:** Visual mechanical inspection and adjust if required. Replace engine oil and oil filter valve clearance adjustment.
- **FUEL SYSTEM:** Inspection of fuel lines, hoses, connection and leakages.
- **ELECTRICAL:** Inspection of battery electrolyte level, combination and other electrical switches.
- **CLUTH and TRANSMISSION:** Replace Transmission Oil**,** Inspection of pedals play and gear shifting adjust if required.
- **BRAKES:** Inspect brake pedal play adjust if required, inspect brake pads shoe replace if required.
- **PARKING BRAKE LEVER:** Inspect lever notches adjust if required.
- **UNDERBODY INSPECTION:** Visual inspect all under body nuts and bolts.
- **TEST DRIVE:** Check brakes, gear shifting, speedometer, AC and any other unwanted vibration and noises.

Genuine V/S Non Genuine Parts

Advantages	Parts	Disadvantages
✓ Acceleration is improved and fast response to throttle opening operation ✓ Engine Power & Engine Performance increases even for uphill & climbing hills ✓ A lower voltage is sufficient to create a spark due to better conductivity	**Spark Plugs**	X With respect to throttle operation, acceleration is not improved at all. X Engine Power & Performance decreases for any road conditions X Higher voltage is required to cause a spark.
✓ Increased Fuel Efficiency ✓ Reduced Exhaust Gas Emissions ✓ Microns level Particles, dust and debris are filtered easily.	**Air Filter**	X Decreased Fuel Efficiency X Exhaust Gas Emissions not controlled Only filter large dust particles resulting noises from engine.
✓ Oil film strength reduces components wear & tear. ✓ No soot & carbon deposits may find in oil sumps & chamber.	**Engine Oil**	X Oil film strength increase chances of components wear & tear. X Heavy deposits of oil may stick with time in oil sump.
✓ Genuine brake pads & shoes do not damage rotor disc & drum with time. ✓ Genuine brake pads & shoes produces less dust as they wear down. ✓ Under a wide range of temperature, brake pads & shoes performance never declines.	**Brake Pads**	X Non-genuine can damage disc & drum with time. X Non-genuine brake pads & shoes produces more dust as they worn out. X At a higher temperatures, brake pads & shoes performance declines with time.

Standards API

- **API** = American Petroleum Institute
- **S** = Spark Ignition Engine

SG → **SH** → **SJ** → **SM** → **SN** **Highest Quality**

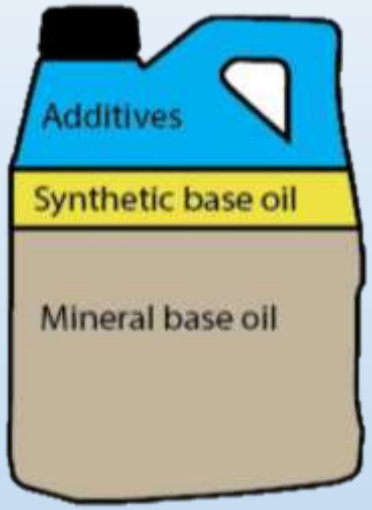

- **SJ** = Fuel Efficiency
- **SL** = Fuel Efficiency + Durability
- **SM** = Fuel Efficiency + Durability + Protect Catalyst
- **SN** = Fuel Efficiency + Durability + Protect Catalyst + Low RPM handling

Composition Criteria

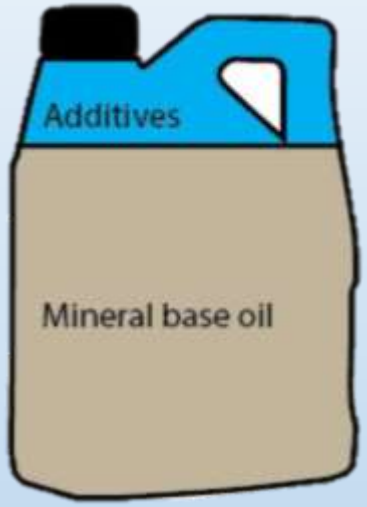

Fully Synthetic Oil

Fully Synthetic engine oil are made by engineering Mineral Oils at a molecular level. This rids the Engine Oil of impurities and makes the molecules more uniform in structure, which allows Fully Synthetic Oils to be used in the most challenging conditions

Semi Synthetic Oil

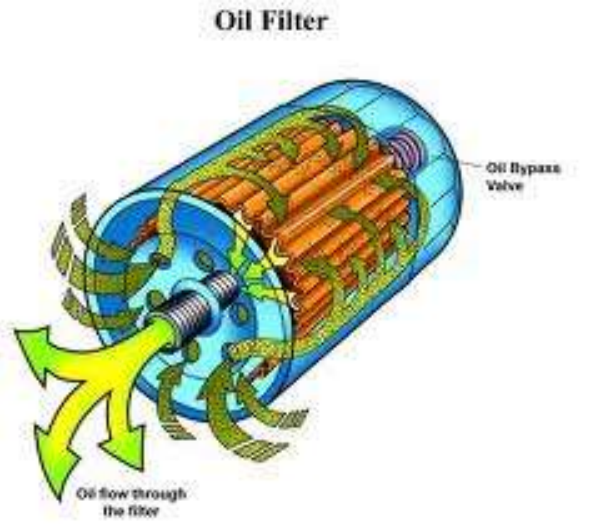

Semi-Synthetic engine Oil is mineral oil which have been mixed with synthetic oils to boost engine performance. This is attained by achieving a blend which maintains the right engine oil viscosity at both high and low engine operating temperatures.

Mineral Oil

Mineral Oil or conventional oils as they are sometimes called, are simply petroleum oils which have been treated to perform over a broad temperature spectrum. These type of engine oils can be used in general commuting conditions.

Engine Oil & Oil Filter

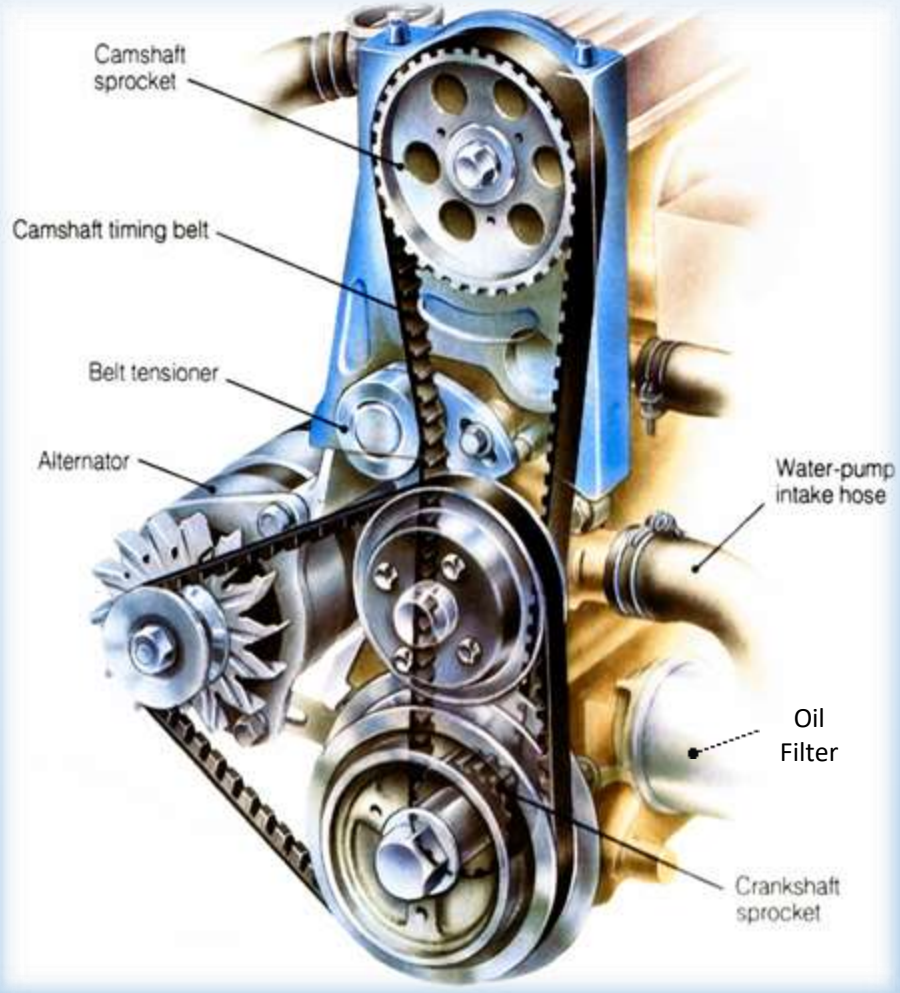

Oil Filter

Care benefits	Damages
Maintain the condition and quality of the oil from the dirt that can damage the bearing	If flow of engine oil is interrupted, it may cause damage to moving mechanical components which will shorten engine life

Function of Engine Oil:

1. It provides lubrication to engine components in order to avoid metal to metal contact that can cause engine wear.
2. It helps in dissipating the heat generated by the combustion chamber. Hence providing a cooling effect.
3. It helps in cleaning carbon precipitate that are formed due to combustion of fuel.
4. Prevent corrosion of engine components by forming a thin film layer on the metal surface.

Timing Belt & V-Belt

V-Belt

Care benefits	Damages
• It keeps the water pump running • It runs the alternator which keep the battery charged	• If V-belt breaks, water pump will stop and engine will over heat • Battery charging system will also stop, resulting in battery drain.

Timing Belt

Care benefits	Damages
• Smooth Operation of cam shaft • Keep the ignition timing stable	• If timing belt breaks camshaft will not rotate causing engine to stop and will not start again until replaced

Engine Coolant

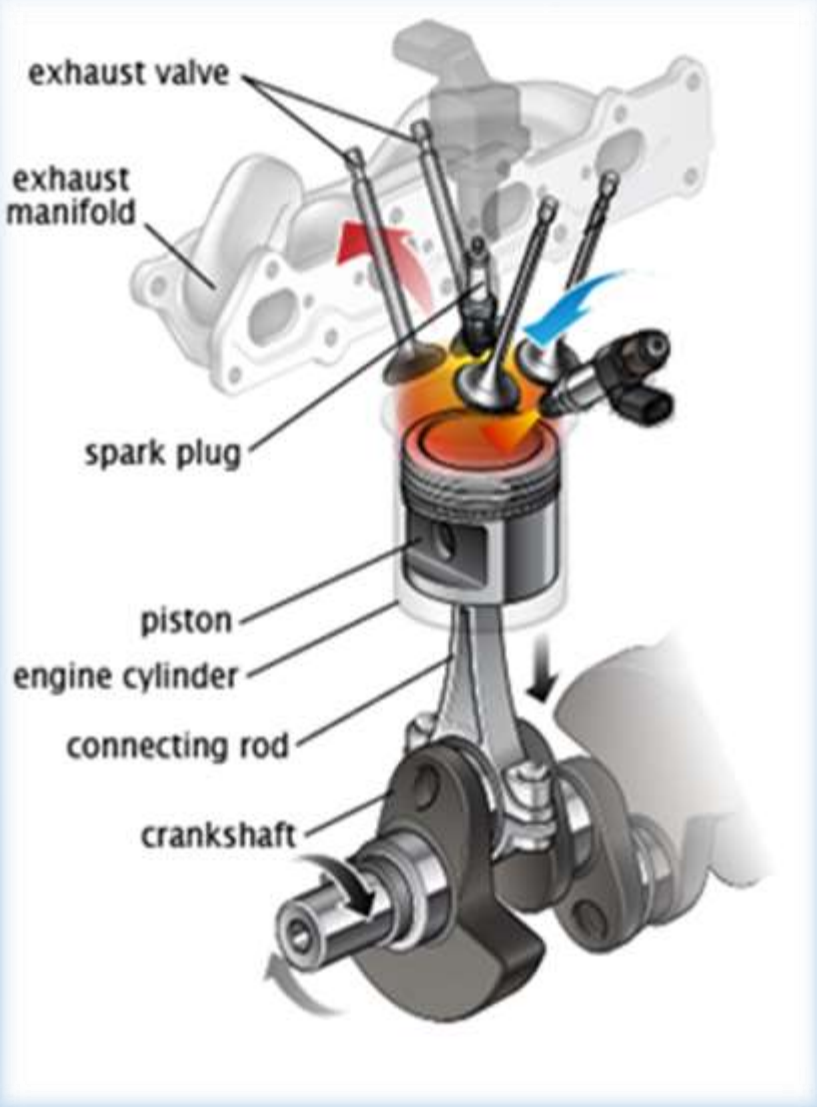

Engine Coolant

Care benefits	Damages
• It removes heat from engine components • It cools the engine as soon as possible and maintain optimal engine operating temperature	• If cooling system (radiator) stops working properly, engine temperature will exceed the optimal range causing engine to stop due to over heating

Engine Performance

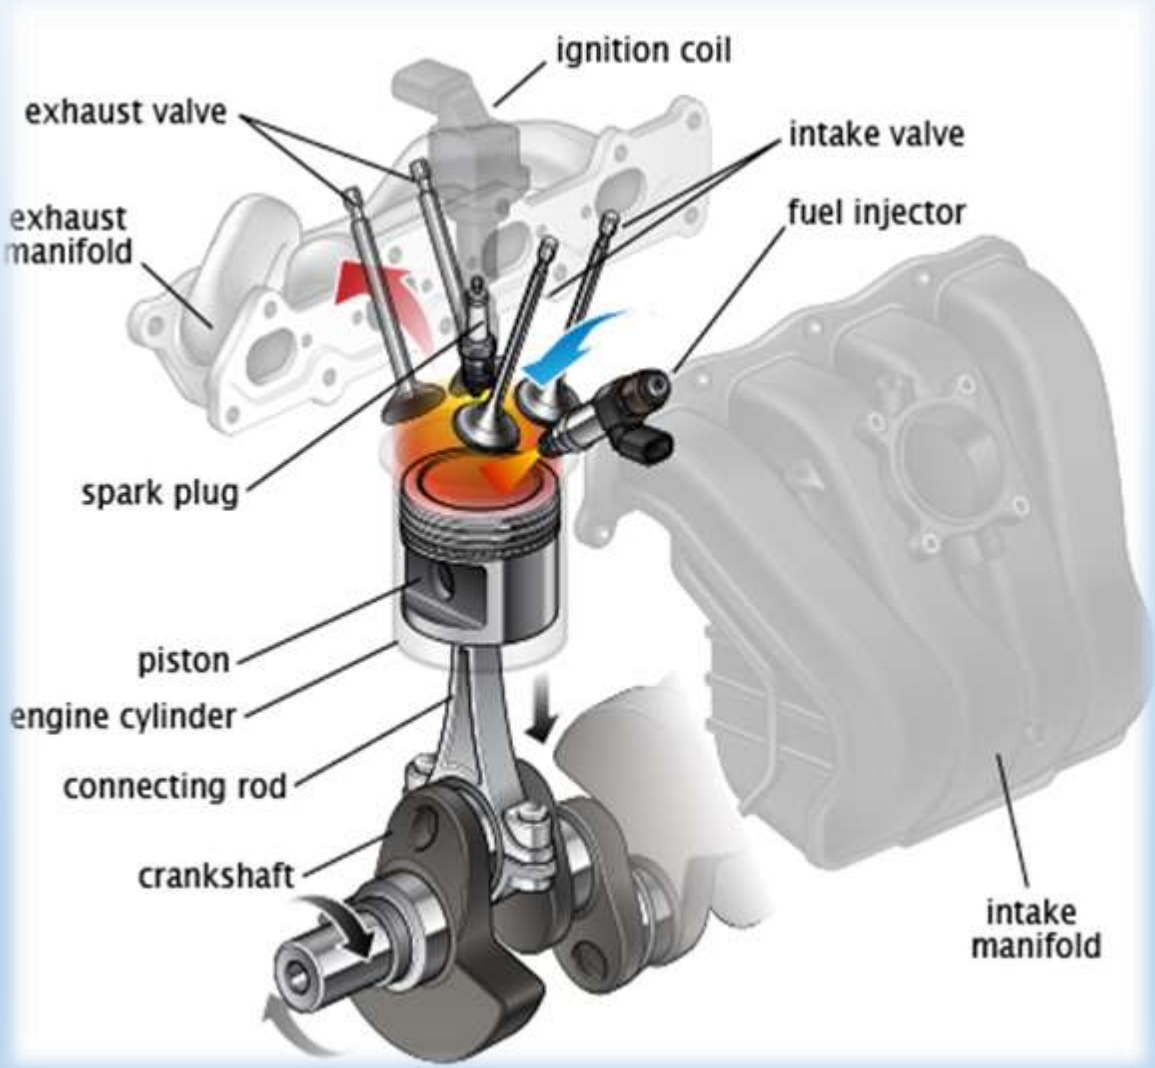

Spark Plug

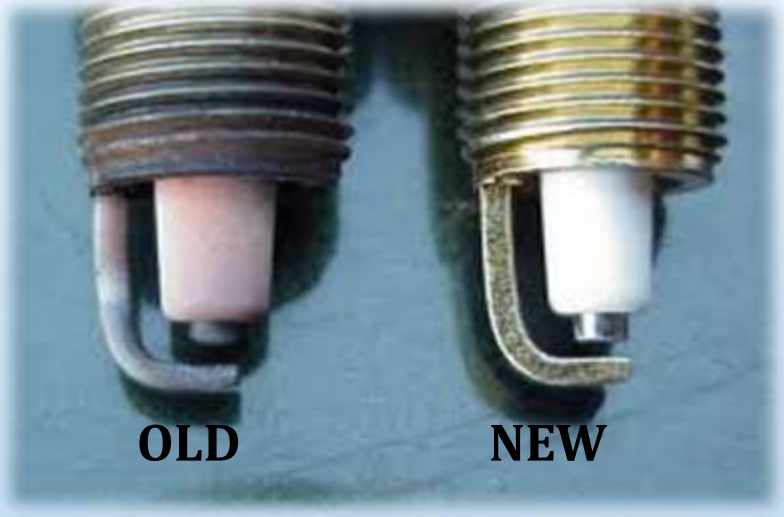

Care benefits	Damages
• Maintain the quality of burning of the air fuel mixture in the combustion chamber.	1. Incomplete combustion of air fuel mixture 2. Poor acceleration and more fuel consumption 3. Shortens engine life 4. Damage to the piston

Piston

Care benefits	Damages
• Piston will transfer max power produced by combustion of air fuel mixture, to the crank shaft with minimal losses	1. Will deliver incomplete power to the crank shaft 2. Can cause fatal damage to the engine

Spark Plug & Piston

Brake Oil Replacement

Clean & Dirty

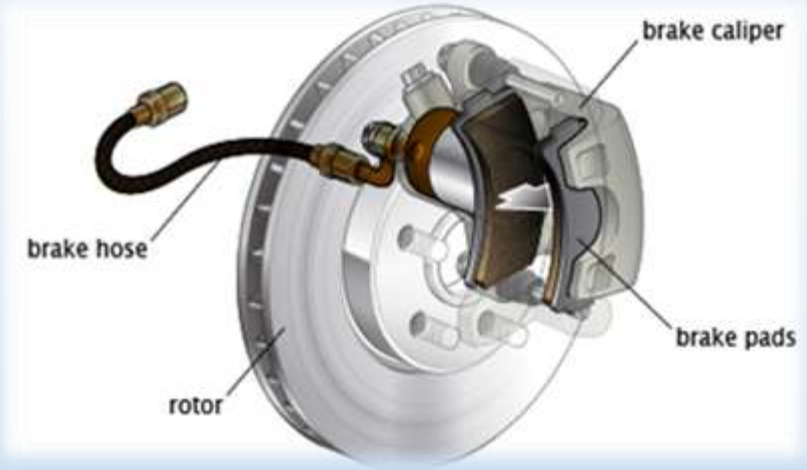

Brake Oil Test

Brake Oil

	Damages
Brake oil replacement under regular interval will maintained the required pressure & force to expand the brake pads and shoes through brake caliper and cylinders pistons for effective braking.	Low brake force will increase the vehicle stopping distance, spongy brake pedal due to excessive moisture & seizing the brake components.

Disc & Drum Brake

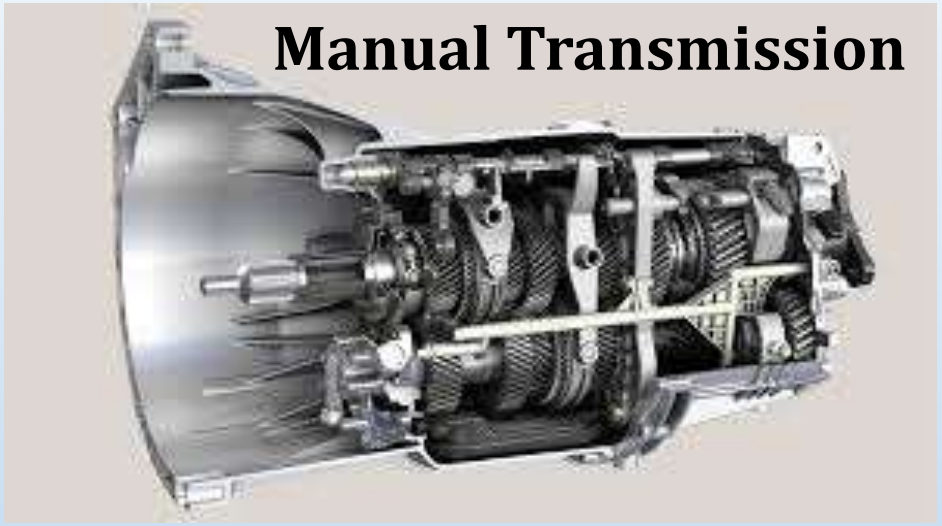

Brake

- Well maintained brakes will provide effective and quick braking as soon as brake pedal is pressed. It will also stop fast moving vehicle in minimum time possible preventing any slippage.

Damages

1. Brake pedal vibrates noticeably when stepped on
2. Worn brake pads damage brake disc
3. Jam brake while braking
4. Distance increases between brake pad and disc

Transmission Oil Replacement

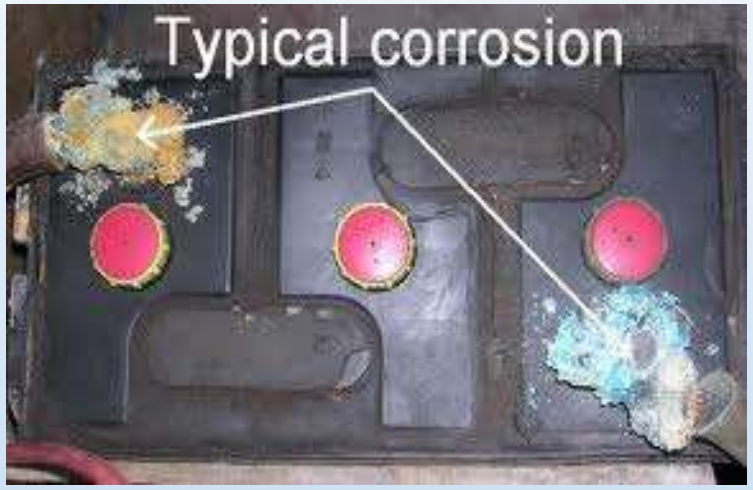

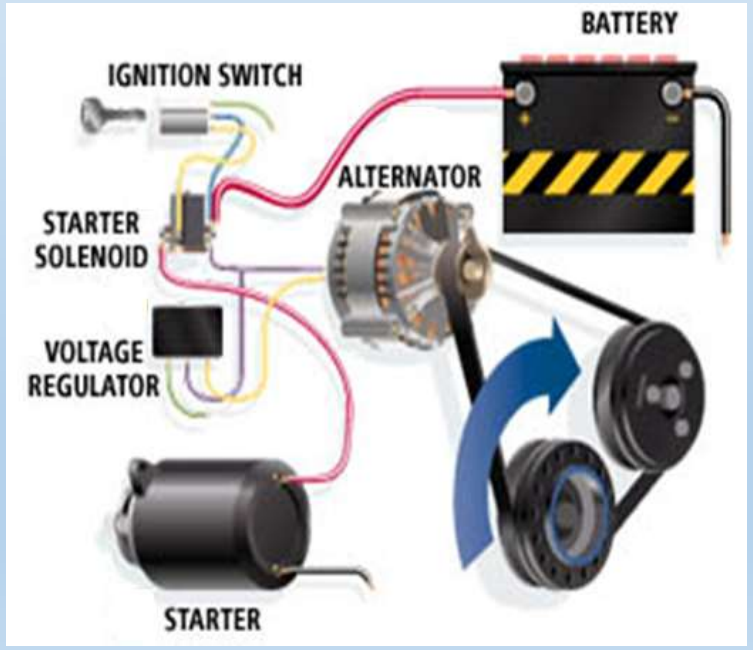

Transmission

	Damages
• To keep the transmission in good working condition and noise free, replace transmission fluid at given interval	1. Difficult to move the gear teeth 2. If the oil layer is thin, it will damage gear components due to metal to metal contact. 3. There will be a rise in noise and vehicle will feel heavy when in gear

Charging System Care

Battery

[redacted]

Damages

Maintain battery function to:

- Store energy generated by the alternator
- Provides electrical energy to lights, starter, indicators etc.

1. Over charging
2. Charging less

Alternator

[redacted]

Damages

- Its main function is to generate electricity

1. Battery is not charged
2. Noisy alternator

Starter Motor

[redacted]

Damages

- It takes the power from the battery and starts the engine

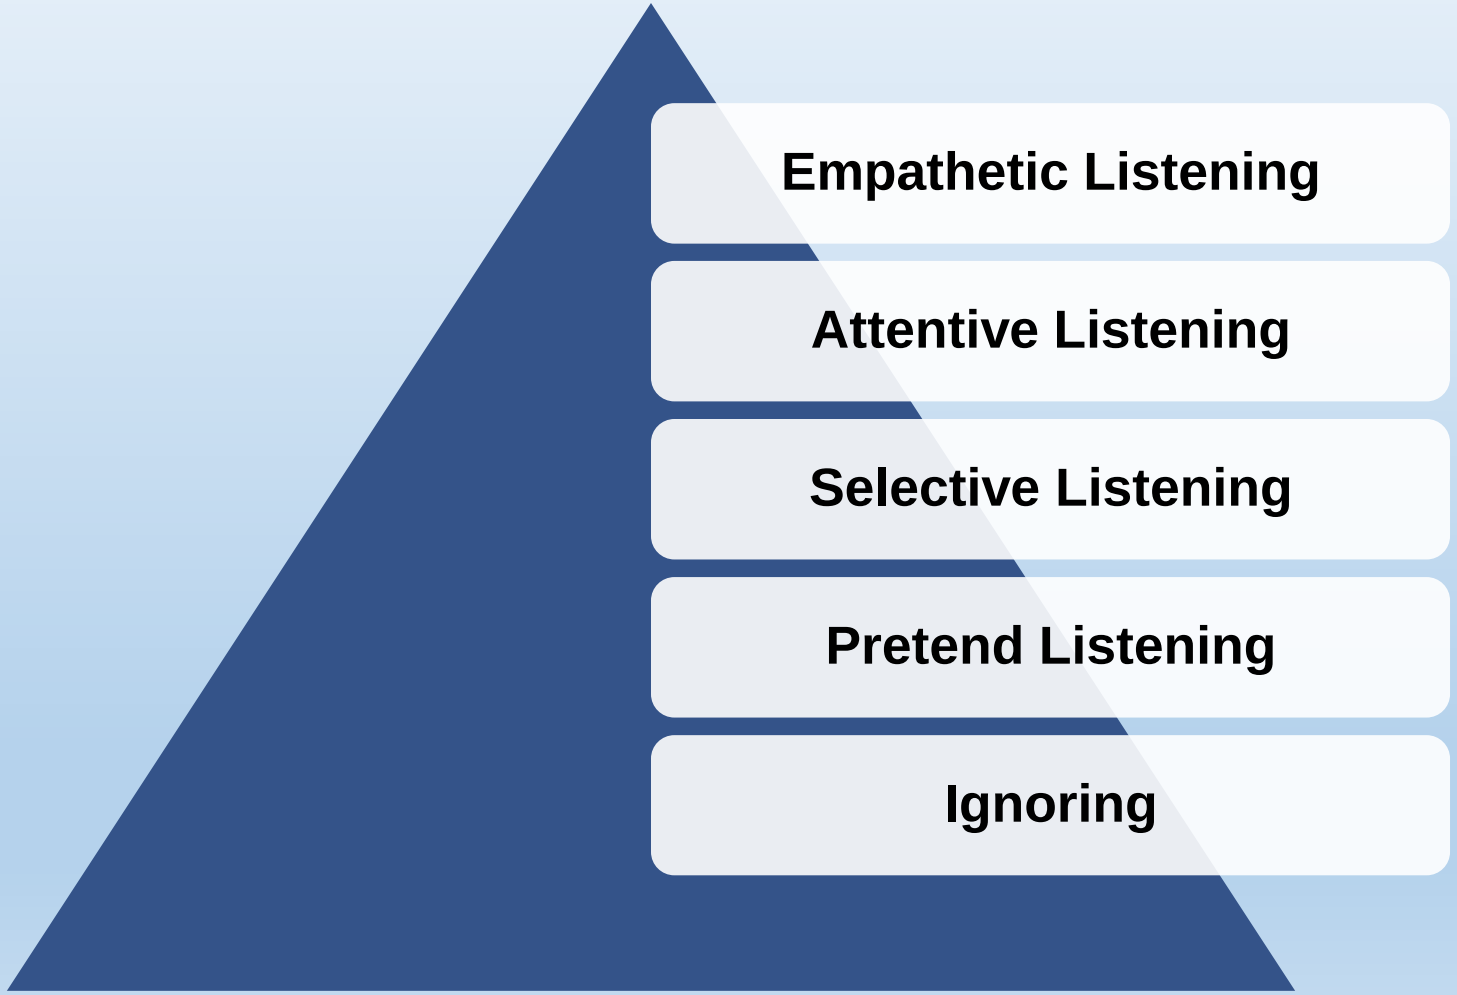

1. Engine hard to crank

Call Handling Skills

Managing the Call

- Answer Promptly (within 3 rings)
- Greet the Caller and Identify Yourself
- Offer to Help
- Listen Carefully
- Use Caller’s name

Types of Listening

Managing the Call

- Avoid blind transfers
  - Ask the caller whether he or she can hold
  - Tell caller to whom they're being transferred
  - Briefly introduce the caller to the coworker

- Closing the Call
  - Close Call Formally
  - Repeat action you agreed to take
  - Say "Good-bye" instead of "Bye-bye"

Abusive Caller

Definition:

- A caller who goes beyond expressing anger about a problem and begins attacking the person handling the call

- Often includes swearing and personal attacks

Handling Abusive Callers

Abusive Callers:

- Stay Calm
- You're not the target
- Give caller warning
  - "I beg your pardon?"
  - "I don't appreciate the language you are using."
  - "If you aren't able to talk with me without swearing, I will have to end this call."
- If the call terminates, inform supervisor immediately
